

Targeting Science

Class Set ADOPTION OFFER

FREE-to-Download Teaching Guides

Make sure you have the **PDF Teacher Guides** at hand to ensure you are getting the most out of the program to benefit your students!

Targeting Science Activity books are packed with interesting and exciting activities to help children/students understand and enjoy science at home or school. These books have been written to support the Australian Primary Science Curriculum Version 9.0 and are divided between:

Biological Sciences | Earth & Space Sciences | Physical Sciences | Chemical Sciences

The Science Understanding and Inquiry Skills elements (including Science as a Human Endeavour) are embedded. Hands-on activities provide opportunities to bring the science concepts to life. The exercises develop process skills such as observing, collecting, recording and organising information and making models of scientific events that happen in the natural world. All activities use easily sourced, inexpensive items.

Topics are introduced with explanations plus images to provide background information. Some lessons include a QR code to access a video for further explanations. Students will be challenged to match, sort, label, sequence, analyse and answer questions with regular vocabulary practice puzzles throughout the book to help them familiarise with scientific terms.

PLUS with every Class Set you receive a FREE Blake Education Subscription

12 Month Access • 650+ resources • Valued at \$99

1 x Teacher Subscription for each Class Set purchased
